Subject: genotoxicity papers to include in invite
[Manas et al 2009a comet.pdf](#)
[Mladinic M. et al. 2009a cyt FISH assay glyphosate.pdf](#)
[Mladinic et al-2009-Environmental and Molecular Mutagenesis.pdf](#)
[Peluso et al-1998-Environmental and Molecular Mutagenesis.pdf](#)
[Roustan A. et al 2014 genotox mixtures glyphosate.pdf](#)
[Alvarez Moya et al, 2014.pdf](#)
[Koller VJ et al 2012 glyphosate hu buccal cells.pdf](#)
[Manas 2009b comet glyphosate metab AMPA.pdf](#)
[Lioi MB 1998 Genotoxicity and oxidative stress in bov lymphocytes.pdf](#)
[bolognesi 1997.pdf](#)

Primarily focus on the studies measuring DNA damage (e.g. comet) and oxidative stress (Koller, Manas, Mladinic 2009a, 2009b)- we would like their overall take on the data and conclusions presented in those papers particularly in the context of the genotoxic/mutagenic potential.

But we would also welcome any comments they have on other in vitro genotox studies cited in iarc report (Bolognesi, Lioi, Peluso, Roustan, Alvarez Moya, and Loi) if they are familiar with those papers.
